

Need a printed shrink-film wrapping service?

Then you need us.

The food and beverage industry is under increasing pressure to reduce packaging costs, improve time to market, and yet still provide exciting packaging for today's trend towards Multi and Variety-packs.

Printed shrink-film has addressed many of those requirements by eliminating the need for corrugate ... yet giving you bold, multi color graphics.

But who do you get to shrink-wrap the printed film?

PROMO WRAP Inc. services Canada's major food and beverage manufacturers. Our people know their stuff and what you need.

Our equipment is capable of handling supported or unsupported: bottles (glass or plastic), cans and boxes, gently, smoothly and efficiently during the shrink-film wrapping process.

We can shrink-wrap these products in most shapes, sizes and configurations. And we do this in large volume, high-speed runs.

The result is an exceptionally good looking, high quality, packaged product at usually lower costs.

When you need to
finalize your packaging
...we'll wrap it up.
